

# The Non-toxic, Sustainable Choice

All Bona floor finishes are non-toxic water-based coatings. The main difference between toxic solvent based coatings and non-toxic water-based coatings is the amount of Volatile Organic Compounds (VOC's) that evaporate as the finish dries.

Bona's low VOC's means there is no need to vacate premises during application due to solvent fumes and no concern about the health effects of toxic chemicals.

## Who is Bona?

- The market leader in non-toxic timber floor finishes globally
- Bona products are available in over 90 countries
- The No1 choice for professional contractors
- Experts in floor coatings & cleaning products since 1919

Please read the additional information regarding Bona finishes, including technical datasheets, safety information and slip resistance certificates at [bona.com.au](http://bona.com.au) before using this product.

# Bona Traffic HD Raw

## Raw experience, true protection

Bona Traffic HD Raw brings a uniquely true wood experience into the world of finished floors. Offering an ultra matt floor surface with a high level of protection, Bona Traffic HD Raw creates a soft haptic feeling of untreated wood, delivering an astonishing tactile sensation.

Haptics is the science of touch. Bona has incorporated haptic technology to achieve a finish that looks and *feels* like raw, natural timber - but with the protection of a finish. Bona Traffic Raw HD is also special because regardless of which angle you view the floor, the sheen remains ultra matt even in reflective light.

A pleasure to walk on with excellent slip safety, Bona Traffic HD Raw is great for homes with children and pets as well as commercial floor surfaces. Bona Traffic HD Raw creates ultra matt floors with great durability - the raw experience of wood, protected. A premium product for a premium look.

- 2 component water-based top coat
- Ultra matt haptic feel
- Low odour, non-toxic
- P3 slip resistance
