

Intergrain
protect, preserve, beautify

The decking oil revolution!

Australia's first high performance
water based decking oil
with unique **HYDR GUARD**
Technology

Intergrain continues to set the benchmark for durability, performance and appearance of exterior timber finishes with the launch of **NEW** groundbreaking Ultradeck

HYDR GUARD™ technology

Using a high performance oil modified resin stabilised in water, Ultradeck provides a unique protective coating that both penetrates into timber and forms a protective barrier on top of the timber.

✓ EXCEPTIONAL DURABILITY

Ultradeck significantly outperforms conventional decking oils in durability and resistance to UV damage, providing longer protection for decking and exterior timber furniture.

✓ WATER WASH UP

Being water based, Ultradeck has extremely low odour, easy water wash up and is naturally much gentler on the environment. This technology also delivers fast dry times, allowing two coats to be applied in one day.

✓ WEATHERS NATURALLY

Like all decking oils, Ultradeck weathers naturally over time without risk of cracking, peeling or blistering so recoating is a simple task.

AVAILABILITY

1L, 4L and 10L sizes in one colour, natural.

Line Shade	Size	Colour
552 94930	1L	Natural
552 94930	4L	Natural
552 94930	10L	Natural
